

Project Status Report Week 12

MS-CS-Insights

Project is: behind/**on**/ahead(of) schedule

General Goals (done by next week)

- Classes sorted by sentiment
- Model is more nuanced / more accurate sentiment
- Functional login page
- Button to filter out channels without enough messages for accurate sentiment analysis
- Clean up Jira

Sentiment Analysis - Ibrahim

Progress from last week

- Experimented and found a more nuanced model

Goals this week

- Implement model fully committed

Slack API integration - Sean

Progress from last week

- Successfully updated Jira with work we have already accomplished and future plans for tracking.

Goals this week

- Maybe: Work on making slack scraper async

Front End + UI Design - Sang

Progress from last week

- Made progress on last week's goals:
 - Sort courses by sentiment scores
 - Add color associated with score

Goals this week

- Continue to make progress and potentially finish the goals
 - Sort courses by sentiment scores
 - Add color associated with score

Database - Owen

Progress from last week

- Login page front end finished
- Still some bugs need to work out
- DB stores user login credentials

Goals this week

- Make front end fully functional

Goals next week

- Encrypt data

Server - Jeremy

Progress from last week

- Started working on the button to filter out channels without messages

Goals this week

- Button to filter out channels without enough messages for accurate sentiment analysis
- Have docker container have an actual build rather than developemnt
